OBJECTIVE

Motivated and detail-oriented student seeking an internship opportunity to apply technical and analytical skills in a real-world environment. Eager to contribute to organizational success while gaining hands-on experience, enhancing problem-solving abilities, and continuously learning new technologies.

EDUCATION

B.Tech in Computer Science and Engineering, Anurag University, Hyderabad **2023 - 2027**
CGPA: 8.5/10 Hyderabad, India

Intermediate (MPC), Sree Vaishnavi Junior College **2021 - 2023**
Percentage: 94.3% Hyderabad, India

SSC, Dedeepya High School **2021**
Percentage: 100% Bhongir, India

SKILLS

Programming Languages	C++, Java, Python, JavaScript
Web Technologies	HTML, CSS
Frameworks/Libraries	React.js, Node.js, Express.js, JDBC
Databases	MySQL, MongoDB
Developer Tools	Git, GitHub, VS Code
Coursework	Data Structures, Operating Systems (Windows,Linux), Computer Networks, OOPs, DBMS
Softskills:	Problem Solving, Analytical Thinking, Communication, Adaptability

PROJECTS

AgriVed : Smart India Internal Hackathon: AgriVed : Smart India Internal Hackathon: Developed Agri-Connect, an AI-powered agriculture platform that helps farmers with crop planning, pest detection, and spoilage prediction. Built the application using Java, Spring Boot, Hibernate, MySQL, JSP/React.js, and integrated machine learning models for predictive analysis. Integrated OpenWeatherMap, Soil Data, and Google Maps APIs along with sensor-based storage monitoring to reduce post-harvest losses and improve agricultural decision-making.

CiviEase : Innoquest Hackathon: CiviEase : InnoQuest Hackathon: Developed CiviEase, a one-stop platform that centralizes information for government ID services like Aadhaar, Passport, PAN Card, and Driving License by aggregating data from multiple government portals into a single interface. Built the application using Java, Spring Boot, Hibernate, MySQL, and React.js/JSP to improve user experience, simplify navigation, and reduce the time required to find documentation procedures and service links.

Blog Application: Developed a full-stack blog platform with role-based access for Authors and Users using React.js, Node.js (Express), and MongoDB. Authors can create, update, and soft delete blog posts, while users can view articles and post comments. Implemented RESTful APIs, authentication, and seamless frontend-backend integration to manage blog content and user interactions.

CERTIFICATIONS

- Achieved NPTEL Certifications in The Joy of Computing using Python, Programming in Java, and Operating Systems.

ACHIEVEMENTS

- Completed 200+ coding challenges on platforms like LeetCode and HackerRank, strengthening expertise in Data Structures and Algorithms.

- Participant – Smart India Internal Hackathon (Project: AgriVed)
- Participant – Microsoft Innoquest Hackathon (Project: CiviEase)
- Participant – Tata Imagination Challenge (2024, 2025)
- Participant – Tata Crucible Campus Quiz (2024, 2025)
